

HOLISTIC GARDENING: BENEFICIAL INSECTS, COMPANION PLANTING, AND ORGANIC GARDENING

Event Date: April 5, 10:00 am

A thriving garden is about more than just planting—it's about creating a balanced ecosystem. In this clinic, we'll explore how beneficial insects like ladybugs and lacewings can help control pests, how companion planting can improve plant health and yields, and how organic gardening practices can make your space more sustainable. If you're looking for natural ways to grow a productive and resilient garden, this is the perfect class for you!
