**Event Date :** March 22, 10:00 am

Healthy soil is the foundation of a thriving garden! In this session, MaryAnn will teach you how to assess your soil's quality and make improvements using natural amendments. Learn about composting, organic matter, and fertilizers that enrich the soil and promote strong, productive plants. Whether you're growing in raised beds or straight in the ground, you'll leave with a better understanding of how to build and maintain nutrient-rich soil.
