MARYANN'S VEGETABLE GARDEN SERIES: INSECT & DISEASE CONTROL

Event Date : March 29, 1:00 pm

Every gardener faces pests and plant diseases at some point, but the good news is that most problems can be prevented or treated effectively. MaryAnn will walk you through how to identify common garden pests and diseases, as well as the best organic and traditional methods for keeping them under control. Learn how to encourage beneficial insects, use natural deterrents, and protect your plants without resorting to harsh chemicals.
