PLANTING TX NATIVES FOR RESILIENCE: ENSURING YOUR GARDEN CAN SURVIVE ANYTHING

Event Date : April 19, 10:00 am

Texas weather is unpredictable—drought, heat, sudden freezes—but native plants are built to withstand it all. We'll show you the best trees, shrubs, and flowers that thrive in our unique climate with minimal water and maintenance. You'll also learn how native plants support local wildlife, conserve resources, and create a landscape that's both beautiful and sustainable. If you want a garden that can handle whatever Mother Nature throws at it, this is a must-attend clinic!
