

# PRUNING FOR BEGINNERS

**Event Date :** March 1, 10:00 am

Pruning can seem intimidating, but with the right techniques, it's easy to keep your trees and shrubs healthy and looking their best. We'll walk you through what to cut, when to trim, and—most importantly—what *not* to touch. You'll also learn how proper pruning encourages new growth, increases blooms, and prevents disease. If you've ever been nervous about picking up the pruning shears, this is the class for you!
